

# Innovative Manufacturer and Distributor of The Finest Industrial Filtration Products

*Serving the Air, Liquid, Gas and Specialty Filtration Needs of  
Today's Worldwide Marketplace Since 1980*

**FILPRO CORPORATION**

*Filtration is Our Business*

# *Name Brand Filtration Products or High-Quality Replacements*

Since 1980, Filpro Corporation has been committed to providing the most up-to-date information and the highest quality filtration products in the marketplace. Our goal is, and always has been, to provide customers worldwide with a single source for all their air, liquid and gas filtration needs.

Filpro offers both name brands as well as our own line of high quality filters. Over the years, we have earned the reputation for responsibility, reliability and innovation.

Some of the main reasons for our success is our unwavering commitment to provide the highest level of customer service, expert technical support and the most cost-effective filtration solutions. Filpro's commitment to technical innovation has provided the industry with benchmark solutions for specific filtration applications. Today, Filpro is recognized as a leader in the distribution, design and manufacturing of high quality filtration products for industry.

## **Building Relationships Through Customer Satisfaction**

Customer satisfaction is the core of our business. From the most fundamental needs to the most demanding filtration problem to pressing emergencies you can depend on Filpro for a cost-effective solution. Our customer service representatives and technical staff are among the most knowledgeable in the industry. They are professionally trained to troubleshoot any filtration problem and take an active role in the complete operation of Filpro. This assures that customer demands are quickly met.

Filpro's mission is to not only to meet your needs, but to exceed your expectations. From your initial contact to after the sale follow-up, our team is committed to providing you with prompt cost-effective solutions to your specific filtration needs, the highest quality products and on-time deliveries.

## **The Right Filter, The First Time...Everytime!**

Filpro maintains a comprehensive database for all types of filtration. Our engineers regularly monitor new filtration specifications in order to provide the most current information in this ever-evolving industry. We also use a state-of-the-art computer system which cross references all filter manufacturers' part numbers. This makes it easy to identify the right filter for a specific application, as well as offer a Filpro replacement alternative, that meets or exceeds the performance of the name brand filter at a much lower cost.

## Custom Design Capabilities

Filpro can meet your filtration needs today, as well as help you meet your development goals of tomorrow. Filpro's Specialty Manufacturing Division welcomes the opportunity to work with customers to develop, custom design and manufacture filters to meet specific performance and dimensional filtration requirements when a standard filter will not work. Our design engineers continuously research the latest advances in filter manufacturing technology, filtration specifications and raw materials. This assures that the newest technology and most innovative design principles are used to cost-effectively solve your filtration problems as quickly as possible. Filpro has helped many companies with filtration solutions that not only met the original manufacturer's requirements, but have helped improve the overall performance of their equipment, resulting in increased production and higher company profits.

In the field, Filpro technicians help customers find high-performing, low cost approaches to filtration needs, maximizing the performance of their equipment and creating much higher returns on investment. This combination of technology and industry expertise makes Filpro the most cost-effective solution available to customers today.

## Extensive Inventory For Fast Delivery Worldwide

Filpro knows the importance of delivering their products as quickly as possible to help customers minimize or eliminate production downtime. In order to respond quickly to the demands of the different industries we serve,

Filpro maintains an extensive inventory:

- Air filter elements
- Dust collector elements
- Liquid filter cartridges
- Liquid filter bags
- Compressor and vacuum pump filter elements
- Hydraulic/oil filter elements

## Technically Advanced Manufacturing Facilities

Filpro has been consistently expanding and improving our manufacturing and design engineering capabilities in order to meet the ever increasing demands of our industry. We are always researching new equipment, raw materials, and manufacturing techniques, which will help us make our filtration products better, faster and more cost-effective. Today, Filpro's manufacturing facilities are state-of-the-art. We take pride in knowing that we have the equipment, the technical expertise and the experienced staff to manufacture the highest quality filtration products in the marketplace. As designer and manufacturer of our own product line we are able to control and monitor product quality and delivery schedules enabling us to provide a superior replacement product line at competitive prices with fast turn around.

## Filpro's Process Controls Are Your Quality Assurance

Quality Assurance is not just a "buzz word" at Filpro. The commitment of every Filpro employee is to provide our customers with the highest quality filtration products to meet their specific needs. Statistical Process Control (SPC) is performed at every stage of the manufacturing process. This process begins with the thorough inspection of incoming raw material to assure material certifications, through the inspection of the finished product. All filters undergo careful inspection before they leave our plant. This guarantees that our products are "free of any defect".

Filpro's objective is to continue expanding and diversifying our product line so that we can offer our customers the most innovative line of filtration products available anywhere.

# Air Filter Elements

## Provide Maximum Protection

In addition to distributing most major brand name and OEM filters, Filpro manufactures a full line of superior replacement air filters. Filpro's air filters are unsurpassed in performance and filter life; they provide maximum protection for compressors, blowers, turbines, engines and all other air handling equipment.

## Designed For Durability

Filpro air filters are designed to meet or surpass the most stringent requirements for long life, superior air flow, high particle retention and highly effective seals. The standard element frames are sturdily constructed of carbon steel; stainless steel and galvanized steel are also available. Both faces of the radial fin are supported by woven wire, and the unit cores are perforated steel to retain strength for the life of the filter and minimize seal failure.

## Wide Choice of Filter Medias

Filpro offers many different filter medias that remove contaminants as small as 0.3 microns up to 200 microns and provide exceptional performance over wide temperature ranges. Filpro filter medias include:

- Polyester
- Paper
- 80 / 20
- Fire Retardant
- Screen
- Spun Bond
- Others to meet specific applications

## Three Filter Styles to Meet Your Specific Application

- Sewn End Styles have a rugged perforated steel core which is attached to pleated woven wire. The filter media covers the frame and end gaskets.
- Molded End Style also have a sturdy perforated steel core. The filter media is pleated between two layers of woven wire. The core and pleated media is then sealed at both ends with a vinyl rubber seal.
- Metal End Cap Style similar in design to the Molded End Style except the core and pleated media is covered at both ends with a metal end cap.

## Special Features of Filpro Air Filters

- High quality replacement filters for brand name and OEM filters that meet or exceed the specifications of the original, at significant savings.
- Extensive cross reference listing most brand name and OEM filter part numbers.
- Custom designed filters to meet your specific application.
- Provide maximum performance and long filter life.
- Choice of filter styles and medias.
- Large Inventory for fast worldwide delivery.

**FILPRO CORPORATION**

# Dust Collector Elements

## Maximum Performance and Long Filter Life

Filpro provides the full range of original and replacement cartridges, bags and tubes to meet the dust collection needs of any industry that requires clean plant air. Our Dust Collector Elements are available in all styles, medias, end cap configuration and provide maximum performance over wide temperature ranges. Filpro will help you choose the filter that will work the best, the longest and will make your job the easiest for your specific application. Even our paper filters are 80% cellulose and 20% polyester to provide exceptional performance in a lower cost filter.

## Media To Meet Your Specific Needs

- Cellulose/Polyester is an 80/20 blend designed to provide greater moisture resistance, longer filter life and lower pressure drop than a standard paper filter.
- Cellulose/Polyester Fire Retardant media is the same as our standard 80/20 blend, but has been specifically designed for application where sparks are a concern.
- Spun Bond Polyester is a superior filter media which outperforms and outlasts any paper media on the market today. This media requires no inner pleat supports, unlike some others with supports that obstruct up to 25% of the air flow, and the outer screens are eliminated to provide even air flow across the media. Spun Bond Polyester is an almost indestructible washable media that provides an increased flow rate, better dirt retention and a greatly improved filter life.
- Spun Bond Hydroscopic is a water resistant media with the same exceptional features as the Spun Bond Polyester media.

## Original or High Quality Replacement Filters

Filpro offers a complete line of replacement filters for dust collection that meet or exceed the brand name or original OEM filters performance specifications. High quality replacement filters are available for:

- Nordson
- Torit
- Farr
- Donaldson
- TDC
- Wheelabrator
- All OEM Filters
- Many others

## Special Features of Filpro Dust Collectors

- High quality replacement filters for brand name and OEM filters that meet or exceed the specifications of the original, at significant savings.
- Technical assistance to determine the correct filter for your specific application.
- Extensive cross reference listing most brand name and OEM filter part numbers.
- Custom designed filters to meet your specific application.
- Provide maximum performance and long filter life.
- Choice of filter styles, end cap configurations and medias.
- Large Inventory for fast worldwide delivery.

**FILPRO CORPORATION**

# Liquid Filter Cartridges

## Maximum Performance For All Liquid Filtration Needs

Filpro provides a full line of brand name and high quality replacement filters and housings for all liquid filtration needs. This includes pleated cartridges, wound tubes, resin bonded filters, spun bonded filters, wire mesh filters, depth cartridges, strainers and bag filters. Expert advice is available on the liquid filtration applications for fuels, hydraulics, coolants, lube oil, coatings, chemicals and water.

## Wide Range of Cartridge Styles

Filpro cartridges are designed to provide the most economical solution for a wide range of liquid filtration needs. They are available in all sizes and types to meet any liquid filtration process with end cap configurations and cores to accommodate all standard housings.

## Wide Range of Medias

Filpro offers a wide range medias to meet your specific application. Our medias feature micron ratings from submicron to 2,000 microns and provide excellent particulate removal with extremely low pressure drop over a wide range of temperatures. For increased filter life and maximum performance washable medias are available to meet most liquid filtration applications.

## Housings to Meet Any Application

Filpro provides expertly crafted cartridge housings to meet any liquid filtration process. Multi cartridge, high pressure, low pressure and duplex housings styles are available to meet your specific application. Materials of construction include 304 through 316 Stainless Steel, Carbon Steel, Aluminum and Polypropylene.

## Special Features of Filpro Liquid Filter Cartridges

- High quality replacement filters for brand name and OEM filters that meet or exceed the specifications of the original, at significant savings.
- Technical assistance to determine the correct filter for your specific application.
- Extensive cross reference listing most brand name and OEM filter part numbers.
- Custom designed filters to meet your specific application.
- Provide maximum performance and long filter life.
- Extensive choice of filter styles, end cap configurations and medias.
- Large Inventory for fast worldwide delivery.

**FILPRO CORPORATION**

# Liquid Filter Bags

## A Cost-Effective Solution to Liquid Filtration Needs

Filpro filter bags offer high solids collection capacity with low pressure drop which translates into longer running cycles and lower operating costs. Filpro filter bags are available in sizes to accommodate all standard liquid bag housings and can be used for filtering a wide range of industrial and commercial process fluids. Our filter bags feature a metal ring sewn into the bag top for increased durability and positive sealing, as well as heavy duty handles for easy installation and removal.

## Wide Range of Media Choices

Filpro offers a range of media choices to meet all micron and operating temperature specifications. Particle retention ranges from submicron to 2,000 microns.

Available in felt, mono filament and multi filament media types in:

- Nylon
- Polyester
- Polypropylene
- Teflon
- Cotton
- Nomex

## Many Options Are Available

For unique filtering challenges Filpro can customize a filter bag to meet your exact needs. We can provide any style filter bag including bags with covers for strict migration requirement, extended length bags, special shaped bags, multilayered high efficiency bags and bags with plastic tops to meet OEM replacement specifications.

## Liquid Filter Bag Housings

Filpro housings are built to the highest standard of performance and are available in all the standard models and sizes currently used in the filtration industry. Materials of construction include 304 through 316 Stainless Steel, Carbon Steel, Aluminum and Polypropylene. Our housings are hydrostatically tested to 1 1/2 times their working pressure, are pre-piped, provide low pressure drop operation, have adjustable height legs and the covers are 5/8" thick with an O-ring seal to minimize bypassing of unfiltered liquid.

## Special Features of Filpro Liquid Filter Bags

- Technical assistance to determine the correct bag for your specific application.
- Custom designed bags to meet your specific application.
- Provide maximum performance and long filter life.
- Choice of bag styles and medias.
- Large Inventory for fast worldwide delivery.

**FILPRO CORPORATION**

# Compressor and Vacuum Pump Filter Elements

## Total Source for Compressor and Vacuum Pump Filtration

Filpro provides a wide variety of brand name and high quality replacement filters to meet all your vacuum pump and compressor applications, including portable/stationary and vertical or horizontal mounting. Our complete line of high quality vacuum pump and compressor filters includes air intake filters, air/oil separator elements, oil filters, exhaust filters, spin-ons and coalescing and particulate filters for point of use filtration.

## Media and Styles to Meet Every Application

Filpro offers a wide range of medias to assure the maximum performance for the specific filtering task at hand. For example, Filpro utilizes the most efficient filter media available for the coalescing of oil aerosols to achieve a removal efficiency of 99.97% of 0.3 micron.

Filpro offers brand name and high quality replacement filters for all domestic and international Vacuum Pump and Compressor OEMs to include:

- Air Maze
- Becker
- Busch
- Consler
- Gast
- Heidelberg
- Ingersoll Rand
- Joy
- Komori
- Mann & Hummel
- Orion
- Rietschle
- Atlas Copco
- Werie
- Worthington
- Sullair
- Gardner Denver

And many others, Please refer to cross reference section for a complete listing.

## Special Features of Filpro Compressor and Vacuum Pump Filters

- High quality replacement filters for brand name and OEM filters that meet or exceed the specifications of the original, at significant savings.
- Technical assistance to determine the correct filter for your specific application.
- Extensive cross reference listing most brand name and OEM filter part numbers.
- Custom designed filters to meet your specific application.
- Provide maximum performance and long filter life.
- Choice of filter styles and medias.
- Large Inventory for fast worldwide delivery.

**FILPRO CORPORATION**

# Hydraulic/Oil Filter Elements

## Maximum Protection Means Less Down Time

Filpro provides brand name and high quality replacement filters to meet the increased performance demands of today's hydraulic systems including cartridges, Spin-ons, Breathers, In Line and Return Line filters. We can help you choose the filter that will meet all your requirements for cleanliness, high capacity, performance, reliability, filter life and economy.

## Medias to Meet Specific Applications

Filpro offers four filter medias which offer the optimum reliability in a wide range of temperatures with retention rates from 1 to 200 microns. This enables you to choose the media that is most effective for your specific application.

- Cellulose is an inexpensive media suited for light duty applications.
- Micro-glass has much better dirt holding capacity and can last up to 4 to 5 times longer than cellulose. It provides the ultimate cleanliness and has superior fluid compatibility with hydraulic fluids, synthetics, solvents, and high water based fluids. Improving fluid cleanliness provides more reliable equipment, less down time and reduced equipment maintenance costs.
- Water Removal Micro-glass has the same features as our Micro-glass media, but offers the advantage of removing small traces of water which significantly increases performance and equipment life in hydraulic and lube systems.
- Stainless Wire Mesh is a washable media which is suitable for heavy duty applications with higher micron retention rates.

## Filter Styles to Meet Every Application

Filpro offers high quality replacement filters that meet or exceed the performance requirements of brand name, domestic and international OEM filters.

- Pall
- Hycon/Hydac
- Parker
- Vickers
- Puralator/PTI
- Textron
- Internorman

And may others, Please refer to cross reference section for a complete listing.

## Special Features of Filpro Hydraulic/Oil Filters

- High quality replacement filters for brand name and OEM filters that meet or exceed the specifications of the original, at significant savings.
- Technical assistance to determine the correct filter for your specific application.
- Extensive cross reference listing most brand name and OEM filter part numbers.
- Custom designed filters to meet your specific application.
- Provide maximum performance and long filter life.
- Choice of filter styles and medias.
- Large Inventory for fast worldwide delivery.

## *Industries Served*

Our filtration products are used worldwide by OEM's and end users in virtually every industrial applications. Some of the major industries we serve include:

- Agriculture
- Air Conditioning
- Automotive
- Aviation/Aircraft
- Chemical Processing
- Conveying
- Defense
- Food and Beverage Processing
- Government
- HVAC
- Hydraulics
- Industrial Gas Production.
- Irrigation
- Medical
- Metal Processing Packaging
- Paint Processing
- Petroleum
- Pharmaceuticals
- Plastics
- Pneumatic
- Printing
- Pulp and Paper
- Refrigeration
- Tool & Machine
- Transportation
- Utilities
- Vacuum Cleaner
- Water Purification
- Wastewater Treatment
